Mountain Weather Forecast

Yorkshire Dales National Park

Forecast valid from 06:00 on Saturday 27 Mar 2021 until 23:59 on Sunday 28 Mar 2021

Forecast Issued on Saturday 27 Mar 2021 at 04:38

Confidence: High for cold, showery conditions on Saturday morning giving way to milder conditions with periods of rain through into midweek, although some uncertainty over duration and intensity of rain due to doubts over position of a slow moving frontal system over the northern UK.

Headline for Saturday 27 Mar 2021: Cold with early snow showers, then milder with rain and increasing winds later.

Forecast for Saturday 27 Mar 2021

Weather: Snow showers will soon die away this morning to leave some good spells of sunshine through the middle of the day. However, cloud above the summits increases this afternoon with outbreaks of rain arriving this early this evening, falling briefly as sleet or wet snow on higher summits. The rain becomes widespread, heavy and persistent later this evening.

Chance of cloud free mountain/hill tops above 600m: Around 40% at dawn improving to close to 100% by late morning. Chances fall to near zero this evening.

Visibility: Occasional or periods of cloud above 600m at first lifting above the summits by late morning. Cloud thickens and lowers through the late afternoon to become periods or persistent cloud above 450-600m with patches below. Away from cloud visibility very good or excellent falling to just a few kilometres in light snow showers and heavy rain.
